

# THE LEGISLATIVE UPDATE

Thursday, January 22, 2009

This update is published weekly during the General Session and monthly during the Interim and Special Sessions.

## Alerts and News from the Hill

The General Session officially begins on January 26, 2009. Nonetheless, the Legislature met last week and again yesterday to hammer out the base budget with 7.5% cuts for the remaining five months of fiscal year 2009 and 15% cuts for fiscal year 2010. It isn't pretty. Almost everything is facing some kind of a cut and many cuts are deep enough to eliminate programs.

Most of the committee budget cut recommendations have been made as of yesterday, particularly for fiscal year 2009. The committees have also been putting together a wish list of items that they would like to fund if the needed cuts end being reduced or if "backfill" money is provided. Executive Appropriations will meet next week (tomorrow's meeting was cancelled) to finalize the 2009 cuts.

The next big question is what February's revenue forecast will look like. While it was initially, generally assumed that the forecast was going to require smaller cuts, new trend analysis shows that we may be approaching or even surpassing that 15% mark for FY10.

The Legislature will likely spend a considerable amount of time during the Session figuring out where to locate "backfill" money to send money back into certain programs and for new legislation. This might include additional revenue sources (bonding and the Rainy Day Fund) and ways to speed up the

money that makes its way to the State's coffers. It will also include some of the Economic Relief that is coming out of Washington; we will see those federal funding amounts by early February.

As an Advocacy Community we would like to send the message to the Legislature that our current budget situation requires a balanced approach that should do more than just cut programs. We also need to make the most of revenue and explore other ways to increase the state's revenue. We should be careful in cutting monies that are used to match federal funds which bring more dollars into the state. It is also essential that state services that help families be a top priority for the state budget, because these families are the ones that have been most affected by the current economic crisis. Aid to low-income families will speed Utah's economic recovery because working families spend immediately and spend locally. We understand that budget cuts are necessary, but it is important that we do not cut the programs that provide services to those who are most in need right now.
